Inside the Kitchen

AFH Operator Journey Quero Mayo

Mayonnaise Superiority Program

Technical proposal – v3

30/10/26

1 The opportunity

Context, program and objectives

Copyright © 1997-2026 MJV Technology & Innovation. All rights reserved.

How to ensure Mayo superiority?

Superiority is won in the bucket, on the line and in the dish

Behind every burger, hot dog and salad, mayonnaise arrives by the bucket or doypack, is decanted into squeeze bottles, mixed into house sauces and dosed again and again during the rush. Chefs judge it by how it tastes, and also by how it behaves: how it opens, doses, holds once open and how much is left at the bottom.

Choice starts outside the kitchen

Price, distributor and availability shape which brand comes through the door.

The pack shapes the work

Opening, dosing, decanting, storing and discarding happen every day, often with workarounds.

Taste is judged in the dish

A mayonnaise has to perform in the burger or the salad, not only on its own.

Copyright © 1997-2026 MJV Technology & Innovation. All rights reserved.

One of three parallel streams

This proposal covers the Chef/Operator Journey

This proposal

Chef/Operator Journey

Ethnography in real kitchens: how mayonnaise is bought, handled, used and judged, and how operators react to the other pack format.

Parallel stream

Competitive Sensory Landscape

A trained panel maps the sensory profiles of Quero and competitors.

Parallel stream

Liking Understanding

A blind CLT with chefs shows what they like when tasting, and why.

Our role Show the real-world context the lab cannot see: purchase, handling, packs and use. No sensory evaluation in the field, so the streams complement each other. Commit to using the Kraft-Heinz' team terminologies and product/packaging attributes to ensure consistency across studies and facilitate cross-analysis.

Copyright © 1997-2026 MJV Technology & Innovation. All rights reserved.

MJV

Project objectives

And how we will know it worked

01 Map the operator journey from purchase to disposal, with its functional, sensory and emotional moments

02 Build behaviour-based operator personas: habits, pain points, workarounds and decision roles

03 Explain brand and pack choice, loyalty and switching, with Quero strengths and weaknesses

04 Compare the usual and the alternative pack format: handling, waste, barriers and switching triggers

05 Turn it into product, pack, menu and value proposition opportunities

Picture of success

Product and pack decisions grounded in how kitchens really work

A clear view of why operators choose, keep or switch brands and formats

Operator language the brand can use to talk to chefs

Copyright © 1997-2026 MJV Technology & Innovation. All rights reserved.

2

How we will do it

Approach, research design and stages

Copyright © 1997-2026 MJV Technology & Innovation. All rights reserved.

Three stages to 18 December

From the category to the kitchen to decisions

01

Understand

NDA to 18 Nov

Market research, expert interviews, recruitment matrix, guides and pilot.

02

Immerse

18 Nov to 9 Dec

Operator diary and in-context visit, with the alternative pack.

03

Make sense

23 Nov to 18 Dec

Synthesis, journey map, personas, pack assessment and a results work session.

In parallel We align the competitor set, hypotheses and recruitment with the sensory and CLT streams, so no chef takes part in both.

Copyright © 1997-2026 MJV Technology & Innovation. All rights reserved.

MJV

Three lenses on every kitchen

What operators say, record and do, checked against each other

A

Market research

Internal and external data + 4 to 6 expert interviews

Scale and context: brands, formats, channels and operator segments.

B

Operator diary

WhatsApp missions before the visit; after it, if timing and operators allow

What happens over days: purchase, delivery, weekends and disposal.

C

In-context observation and interview

One visit per kitchen, on a normal day

What we see and why: real use, workarounds, brand choice and first contact with the alternative pack.

Brand-neutral The study is presented as research on mayonnaise in professional kitchens. The sponsor is never revealed, and all main brands are covered the same way.

Copyright © 1997-2026 MJV Technology & Innovation. All rights reserved.

MJV

18 operators in two contrasting cities

Recruited by real usage, not equal splits

10

São Paulo

Largest AFH market, with the widest mix of segments and brands

8

Recife

Hot climate, different channel structure and brand mix

Quota	Criteria
Pack format	Bucket vs. doypack, min. 3 of each per city
Brand used	Quero | Competitor B | others, min. for Quero
Segment	Burgers and snacks | independents | pizza, delivery | QSR
Decision role	Owner-operator vs. hired chef, min. 3 of each per city

Why 10 and 8: São Paulo needs more cells to cover its segment and brand variety; 8 keeps the Recife contrast with one visit a day over two weeks. As aligned with the client, the final split does not need to strictly follow a specific quota for Quero or market share data.

All participants use mayonnaise regularly and decide or strongly influence its purchase. 2 backups per city. Matrix validated by Kraft-Heinz before fieldwork. Extreme users may be included within the 18, depending on internal feedback.

Copyright © 1997-2026 MJV Technology & Innovation. All rights reserved.

MJV

One visit, the kitchen at work

A normal working day, in a slot with quiet moments for guided observation

1

Observation | 2 to 3h

Prep, service and the rush, without interrupting the line

2

Guided walk-through | 30 min

“Show me how you…”: decanting, storing and cleaning, with questions

3

Interview | 1h

With the decision-maker: brand repertoire, purchase story and what we saw

4

Disposal

Review of the week’s empty packs and the latest invoice the operator kept

5

Card exercises

Brand perceptions, sponsor hidden, and 10 to 15 desires rated

6

Alternative pack

Same brand, other format, tried in real prep to close the visit

Day plan Lunch kitchens: walk-through at prep, rush, then interview, at a quieter moment. Dinner kitchens: walk-through in the afternoon, then the rush and the interview, once it's quieter. If only a closed day is possible: walk-through and interview, plus a video of the rush in the diary, before the visit.

Copyright © 1997-2026 MJV Technology & Innovation. All rights reserved.

MJV

From insight to innovation

Benefits show where kitchens are poorly served today

THE UNFULFILLED BENEFIT

"Help me keep every burger tasting the same at the peak of the rush, without slowing the line."

Illustrative example

THE WHITE SPACE

Rush-proof consistency

Desire	The same portion every time, fast, and a sauce that tastes like the house
Barrier	Thick product that clogs bottles, buckets hard to scrape, new staff every month
Current solutions	Decanting into squeeze bottles, portions by eye, a spatula for the bottom of the bucket
Trigger	A pack that doses straight into service, with no decanting. They would switch.

White space: dose-ready consistency. The right amount, every time, with no decanting.

Illustrative example

THE FRAMEWORK

Desires
What the operator wants from the dish and the service

›

Barriers
Time, skill, space and cost limits in the way

›

Current solutions
What they hire today: brands, packs, tools, hacks

›

Triggers
What would make them drop a routine they defend

›

White spaces
The gap between reality and desire. **The innovation territory.**

MJV

01. Understand the category

OUR ACTIVITIES

MARKET RESEARCH

- Desk research with Kraft-Heinz data: share, VMS, channels and segments
- External sources on AFH brands, formats and channels
- 4 to 6 expert interviews: trade, buyers, chef consultant, internal teams

FIELD SET-UP

- Recruitment matrix and screener, by real usage
- Observation and interview guides, diary missions and desire cards
- Consent terms for images and verbatims
- Pilot with 1 operator in São Paulo

CLIENT ACTIVITIES

- Market data, incl. share by region and format, on NDA signature
- Priority segments and applications
- Existing insights, and internal interviewees
- Previous journey reports and templates
- First recruitment matrix validated by 5 Nov; final after the expert interviews

DURATION: NDA to 18 Nov

DELIVERABLES

- Category and operator overview
- Recruitment matrix and screener
- Field kit: guides, diary missions, desire cards
- Pilot learnings and adjusted guides

Copyright © 1997-2026 MJV Technology & Innovation. All rights reserved.

MJV

What you'll get from stage 01

Illustrative examples of the outputs: the real content comes from the field

Category and operator overview

	Bucket	Doypack
Burgers and snacks	xx%	xx%
Independents	xx%	xx%
Pizza and delivery	xx%	xx%
Regional QSR	xx%	xx%

Shade: share of usage by segment and format

The data shows
Who sells most, by channel and region

The field adds
Who uses each format, and why they switch

Recruitment matrix

Quota	São Paulo	Recife
Bucket	5	4
Doypack	5	4
Owner-operator	6	5
Hired chef	4	3
Quero users	3+	3+
Backups	2	2

Expert interviews

Distributor

"When the bucket runs out mid-week, they buy whatever the cash-and-carry has."

Feeds: triggers

Central kitchen

"We buy for twelve kitchens. Yield per bucket matters more than the brand."

Feeds: desires

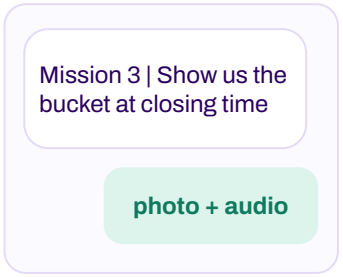

Kraft-Heinz team

"Sales hears when a pack does not fit the line long before anyone else."

Feeds: barriers

Field kit

Observation and interview guides

Diary missions

Desire cards

Copyright © 1997-2026 MJV Technology & Innovation. All rights reserved.

02. Immerse in the kitchen

OUR ACTIVITIES

OPERATOR DIARY

- 15-minute onboarding call on WhatsApp
- Block 1: 5 days with the usual product
- Block 2, if timing and operators allow: the alternative pack
- Daily reminders and replies from the researcher

IN-CONTEXT VISIT

- One visit per kitchen on a normal day, about 4 to 4.5h
- 2 to 3h of observation: prep, service and the rush
- Guided walk-through (30 min) and interview with the decision-maker (1h)
- Desire cards: 10 to 15 desires rated on importance and satisfaction
- Alternative pack introduced in real prep, to close the visit
- Pack test format agreed with Kraft-Heinz during fieldwork

CLIENT ACTIVITIES

- Alternative packs for every brand, before the first visits
- Decision on the pack test format, with us
- Observers in selected visits

DURATION: 18 Nov to about 9 Dec

DELIVERABLES

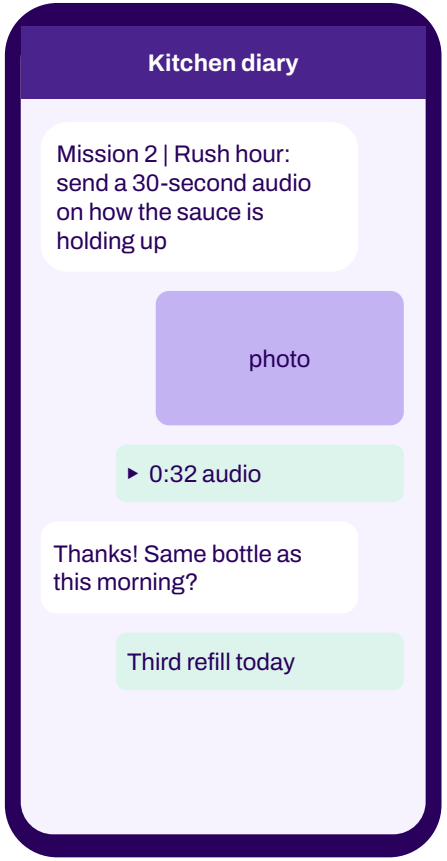

- Weekly field updates
- Field notes organised by operator
- Photos, videos and verbatims, with consent
- Desire ratings by operator

Copyright © 1997-2026 MJV Technology & Innovation. All rights reserved.

What you'll get from stage 02

Illustrative examples of the outputs: the real content comes from the field

Diary mission

Weekly field update

Week of 23 Nov | 6 kitchens visited

1 Decanting happens before every shift
2 Bucket bottoms are scraped with a spatula
3 Staff dose by eye at the rush

photo

photo

"At the rush nobody measures. It's the bottle and the hand."

Desire ratings | one operator

Operator field file | said vs. recorded vs. observed

Said | interview

"We use the same amount on every burger."

Recorded | diary

Day 3: two squeeze bottles at different levels; audio: "busy night, refilled twice."

Observed | visit

Portion changes with the cook; no measuring tool on the line.

Gap: consistency is a desire the current solution does not deliver. A possible white space.

Copyright © 1997-2026 MJV Technology & Innovation. All rights reserved.

MJV

03. Make sense of it

OUR ACTIVITIES

SYNTHESIS

- Weekly synthesis sessions during fieldwork
- Said vs. recorded vs. observed, operator by operator
- Benefits built by our team as the analysis lens
- Behaviour-based personas and pack assessment

SHARING RESULTS

- Findings shared in the weekly field updates
- Results work session on 18 Dec with R&D, Marketing, Sales and CMI
- Kraft-Heinz input, next steps and how to use the results

CLIENT ACTIVITIES

- Feedback on the weekly updates
- Feedback on the benefits
- Work session participants from each area
- Report templates

DURATION: 23 Nov to 18 Dec

DELIVERABLES

- End-to-end journey map
- Personas, with benefits
- Current vs. alternative pack assessment
- Opportunity landscape of white spaces
- Final report and executive presentation

Copyright © 1997-2026 MJV Technology & Innovation. All rights reserved.

What you'll get from stage 03

Illustrative examples of the outputs: the real content comes from the field

End-to-end journey map

● emotional curve ● moment that matters

Purchase	Delivery	Storage	Prep	Service	Portioning	Disposal

Persona, with a benefits add-on

RF **Rafa, 38**
Owner-operator, burger bar in SP

Buys: bucket, at the atacarejo
Values: speed in the rush
Pain: decanting every day
Decides: price, stock-outs

\+

Add-on: benefits

"Help me keep every burger tasting the same at the rush, without slowing the line."

Desire: same portion, fast
Barrier: clogged bottles
Current solution: decanting
Trigger: a dose-ready pack
White space: dose-ready consistency

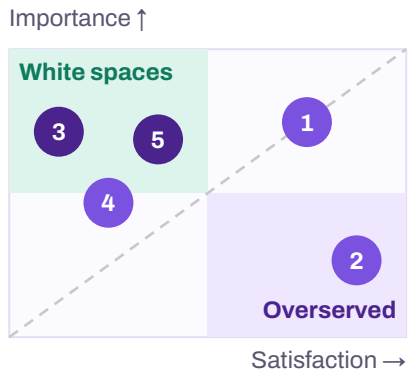

Pack assessment

Journey step | desire	Bucket	Doypack
1 Storage No spoilage once open	●	●
2 Prep Quick to open and start	●	●
3 Service Same portion every time	●	●
4 Portioning Faster bottle refills	●	●
5 Disposal Less product left behind	●	●

● satisfied ● workaround ● dissatisfied

3 Timeline & investment

Copyright © 1997-2026 MJV Technology & Innovation. All rights reserved.

Timeline

About seven weeks, from the NDA to the final delivery on 18 Dec

Milestones: start on NDA signature (30 Oct to 2 Nov) | first recruitment matrix and early recruitment start by 5 Nov | recruitment deadline around 19 Nov | visits from about 23 Nov | results work session and final report 18 Dec

Green: 01 Understand | Yellow: 02 Immerse | Pink: 03 Make sense | Dates are targets, adjusted with Kraft-Heinz as recruitment progresses

Copyright © 1997-2026 MJV Technology & Innovation. All rights reserved.

Scope of work and commercial terms

AFH Operator Journey Quero Mayo | final delivery on 18 December 2026

Objective

Understand how mayonnaise is bought, handled and used in real kitchens, and how operators react to the other pack format, to ground Quero's product, pack and value proposition decisions.

Scope in three stages

01 Understand

Market research, 4 to 6 expert interviews, recruitment matrix, field kit and pilot

02 Immerse

18 operators in SP and Recife: diary, a visit on a normal day and the alternative pack test

03 Make sense

Synthesis, benefits, final report and a results work session

Key deliverables

- ✶ End-to-end journey map
- ✶ Personas, with benefits
- ✶ Pack assessment, bucket vs. doypack
- ✶ Weekly field updates
- ✶ Opportunity landscape of white spaces
- ✶ Final report and results work session, 18 Dec

Total investment

R$ 460,792.00

Included: team fees, recruitment and incentives for 18 operators, diary, visits, the alternative pack test, 2 trips to Recife and the results work session.

Not included: alternative Quero packs (supplied by Kraft-Heinz), and the sensory and CLT streams.

Payment terms

60% On approval

40% On final delivery, 18 Dec

Invoicing

MJV Tecnologia e Inovação Ltda.
CNPJ 05.940.894/0001-13
Address: Av. Marechal Câmara, 160/533, Centro, Rio de Janeiro/RJ, CEP 20.020-080.

Copyright © 1997-2026 MJV Technology & Innovation. All rights reserved.

MJV

Assumptions and re-evaluation triggers

What the price assumes and what makes us review it

Parameter	Assumption	Re-evaluation trigger
Sample	18 operators, SP 10 and Recife 8; extreme users may be included within the 18	More operators or a third city: separate proposal
Fieldwork	Per operator: diary before the visit and one visit on a normal day (about 4 to 4.5h); pack test format agreed during fieldwork	A second visit requirement
Recruitment	Starts with the first recruitment matrix, by 5 Nov	Behind at the check around 19 Nov: dates adjusted with Kraft-Heinz
Travel	2 trips to Recife, 1 researcher each, 4 to 7 nights in total	More trips or nights
Kraft-Heinz inputs	Market data, incl. share by region and format, on the day the NDA is signed; first recruitment matrix validated by 5 Nov, final after the expert interviews; internal interviewees available	Delay that holds up the recruitment matrix approval
Alternative packs	Supplied by Kraft-Heinz for every brand in the sample, before the first visits	Late delivery or a missing format

Copyright © 1997-2026 MJV Technology & Innovation. All rights reserved.

Premises for success

What the project needs to run as planned

1. Governance and agility

Dedicated focal point: Designation of a point of contact at the client to centralize the provision of information and feedback, avoiding communication bottlenecks.

Quick approvals: To meet the schedule, stage, and material validations must occur within the agreed deadlines.

Key stakeholder involvement leadership: The point of contact will be responsible for ensuring the participation of key stakeholders and decision-makers at key moments defined in the stages, in order to ensure that the project progresses as planned.

2. Access to information and data

Internal data and information: Access, at kick-off, to the internal material relevant to the project, such as previous studies, market and performance data, and current strategic plans, so the team starts from what the client already knows.

Knowledge sessions: Short sessions with the client's experts, when needed, to explain products, processes or data that the documents alone don't cover.

Third-party data: If the project needs paid reports or databases, they are quoted separately or purchased directly by the client.

Copyright © 1997-2026 MJV Technology & Innovation. All rights reserved.

Terms and conditions

What this proposal assumes and includes

Working together

1. For the MJV team to meet the established deadlines, it is imperative that the relevant stakeholders have availability in their agendas.
2. The client needs to select the participants who, directly or indirectly, will support this project and guarantee their participation in the necessary stages.
3. If the project and/or delivery scope exceeds the terms of this proposal, the client agrees to a proportional cost increase. Changes or extra additions after final approvals also result in additional orders provided.
4. Delays in the approval of the client will add more time and cost to the delivery of two materials.
5. Once the files are approved and delivered, MJV is not responsible for any alterations to the content of the images. Translation and revision of text content are not included.

What is not included, and commercial terms

6. Stock images, videos, illustrations and any printing products are not included in the price. These will be charged separately, if necessary.
7. Logos, slogans and other brand items that may be created in this project do not include trademark registration costs (trademarking).
8. Cancellation Policy: If the project is canceled before execution, 50% of the total invoiced value will be charged, in addition to two costs related to travel expenses and third party contracts, in accordance with the cancellation policy of each third party.
9. Invoice to MJV Brazil, Rio de Janeiro:
   MJV Tecnologia e Inovação Ltda.
   CNPJ 05.940.894/0001-13
   Address: Av. Marechal Câmara, 160/533, Centro, Rio de Janeiro/RJ, CEP 20.020-080.

Copyright © 1997-2026 MJV Technology & Innovation. All rights reserved.

Our policies

GDPR and intellectual property requirements

Data processing

Once the processing of personal data becomes necessary for the execution of two services, the following precautions must be taken:

- The sending of personal data by the contracting party to MJV must be done anonymously. There is no need for MJV to receive complete personal dice so that the holders of the two dice are identified;
- Prior anonymization of these data is not possible, or its processing must be carried out by MJV in the client's digital environment.

Clause | intellectual property

1. Each party remains the exclusive owner of intellectual property rights over the goods eventually used in the provision of services, as well as their respective registered trademarks, patents, software, methodologies, processes, know-how and commercial or industrial secrets.
2. The CONTRACTING PARTY will be the exclusive owner of all property rights over the results of the services, such as designs, plans, methods, processes, texts, images and audio, and any other protected assets ("created assets"), since these are provided for in the scope of the services, as detailed in the respective Commercial Proposal.

GLP-1 Scale: Re-shaping Beauty Contours

CLIENT'S AREA

Research & Innovation / CMI Brazil

PROJECT TYPE

Consumer Insights & Trends, Product Innovation Strategy, Strategic Design

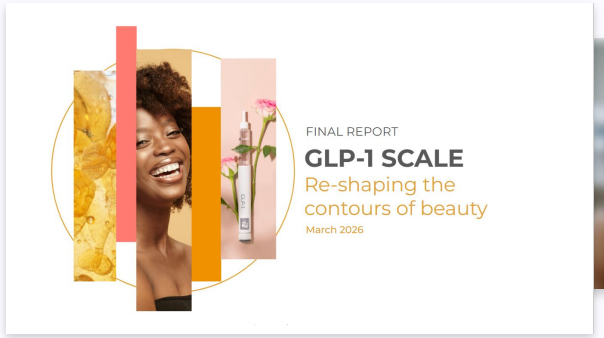

CAPABILITIES

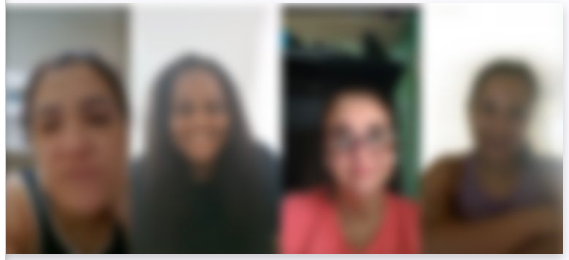

Social Listening, Desk Research, In-depth Interviews

In partnership with a company in the beauty sector, MJV conducted a qualitative deep-dive research to understand the GLP-1 receptor agonists (Ozempic, Mounjaro..) phenomenon and its impact on the beauty ecosystem in Brazil.

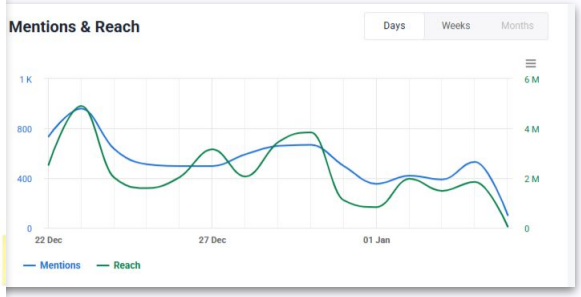

Through an integrated research approach combining AI-driven social listening with deep human intelligence from 20 consumers and 12 experts, we mapped the shifts in skincare, haircare, and body care triggered by rapid weight loss. The project's insights were consolidated into a strategic diagnostic that identified five key consumer needs and multiple product and service innovation opportunities.

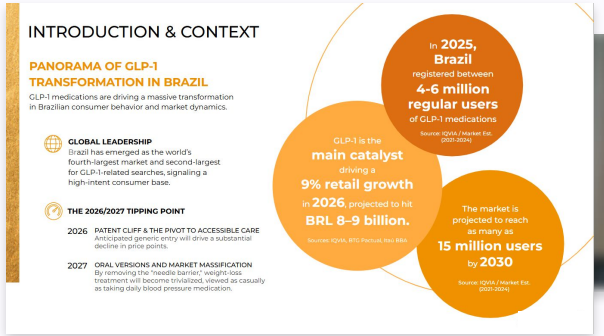

This created a foundation for the company to lead the emerging "aesthetic preventive and recovery" beauty market, reframing high-performance dermocosmetics as an essential part of the new metabolic health journey.

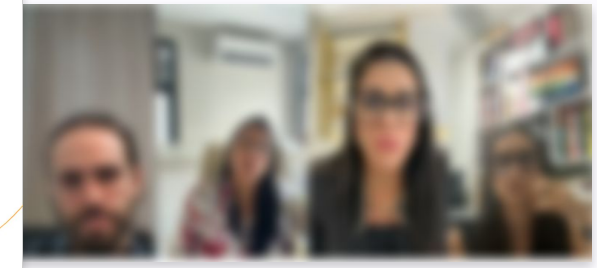

Copyright © 1997-2025 MJV Technology & Innovation. All rights reserved

Challenge

From Clinical Insights to Beauty Strategy: Redefining opportunities for Product Beauty Innovation at the GLP-1 high

Following the global surge of weight-loss medications, the challenge was to decipher the GLP-1 phenomenon in Brazil, the beauty company needed to understand how rapid physiological and behavioural changes redefine beauty priorities. The objective was to transform this medicalized trend into a high-performance innovation map for skincare, haircare, and body care .

How we did it

MJV conducted an in-depth qualitative study of the Brazilian beauty ecosystem, combining the following:

In-depth qualitative interviews: Conducted in-depth narratives with 20 diverse consumers and 12 multi-disciplinary experts (physicians) to ensure technical accuracy.

Strategic Desk Research: Assessed the impact of GLP-1 agonists to reframe initial assumptions, formulating strategic questions that guided new brazilian market possibilities.

Social Listening: Monitored online discourse across platforms to quantify interactions and identify cultural nuances regarding the "Ozempic Face & Body" phenomenon.

Deliverables

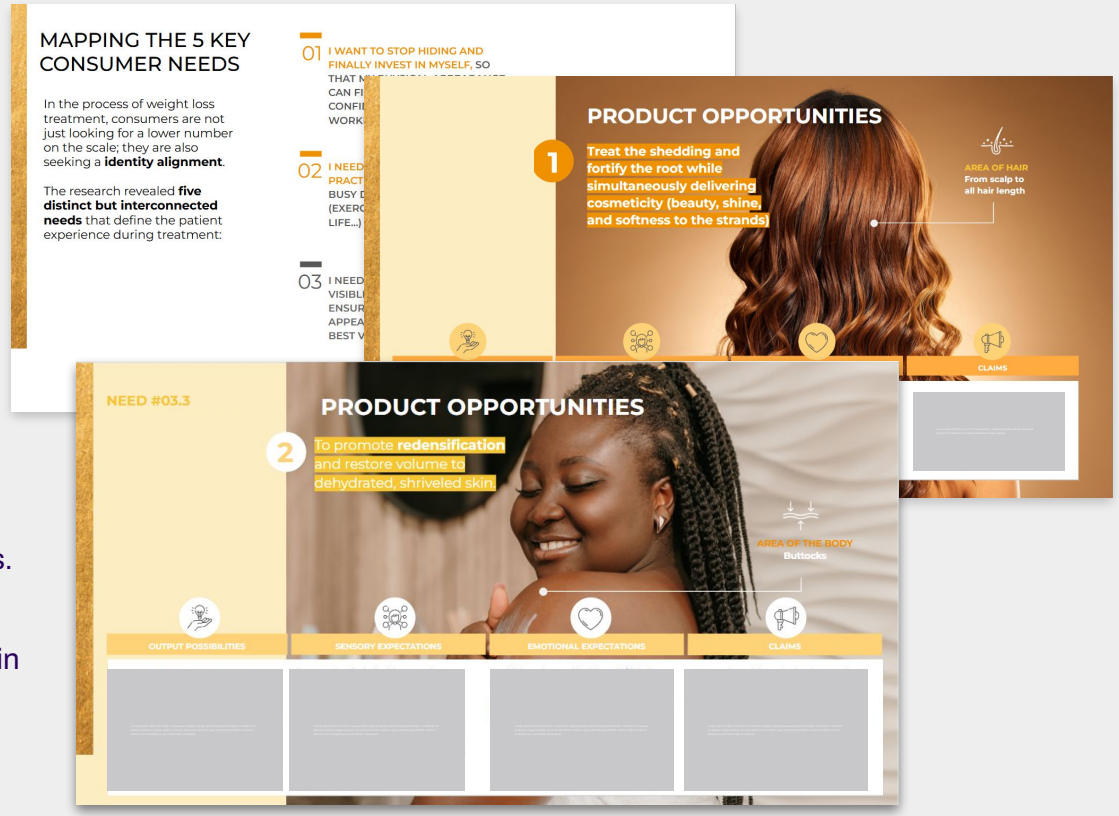

The project delivered a strategic diagnostic foundation designed to guide innovation and future growth:

- **A Strategic Insights Report:** A comprehensive mapping of the physiological and behavioral shifts triggered by rapid weight loss. The report also contained:
  - **A Product Opportunity Map:** Identification of top consumer needs, territories for innovation, products, and services based on key consumer needs.
  - **Strategic Positioning Pillars:** A guideline on how to position the brand in this new era where consumers are undergoing rapid physical transformations.

Impact

By identifying how consumers routines and preferences change during and after GLP-1, the client can strategically position itself as the essential companion to the medical weight loss journey.

The study widened client's view of the competitive landscape beyond traditional beauty categories to include everything a consumer "hires" to make progress during their weight loss journey.

Beauty Under Constraint

Translating water scarcity challenges into scalable beauty innovations for a global beauty leader

CLIENT'S AREA

Research & Innovation / CMI Brazil

PROJECT TYPE

Consumer Insights & Trends, Product Innovation Strategy, Strategic Design

CAPABILITIES

Netnography, Desk Research, In-depth Interviews, Cultural Probes

We explored paths to translate consumer resilience to water scarcity into scalable innovation opportunities for a global beauty leader, connecting Brazil's diverse local realities, self-care needs, and product development.

The company had already set a global ambition to offer water-saving products and technologies in water-stressed markets by 2030. However, transforming this offering into a scalable model required overcoming Brazil's complex paradox: a country with abundant freshwater, yet heavily impacted by unequal infrastructure, severe climate events, and a profound cultural and emotional connection to bathing. The objective was to understand how water shortages—whether through chronic scarcity, extreme collapse, or unreliable supply—affect daily human dignity and to identify concrete ways to evolve the hair, face, and body care categories.

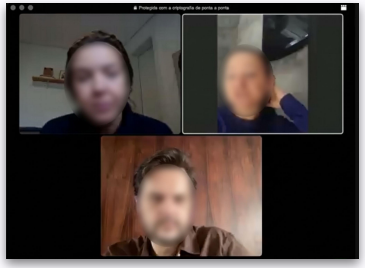

Copyright © 1997-2025 MJV Technology & Innovation. All rights reserved

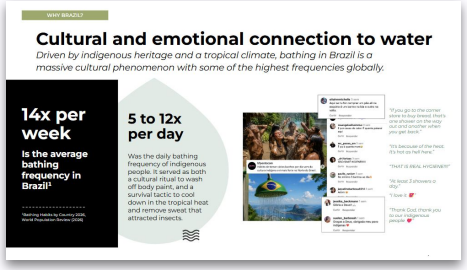

Strategic Report

Cultural Probes

In-depth interviews

Desk Research + Netnography

Challenge

Evolve a leading beauty portfolio to meet consumers' diverse self-care needs under water stress, overcoming barriers of sensory performance, formula removal, and portability.

The challenge was to understand how to overcome specific product-level barriers such as the tacky residue of the "false clean", heavy formula build-up, long treatment wait times, and the sheer difficulty of washing off high-SPF and long-wear cosmetics, all while the company strengthens its capacity to deliver uncompromising hygiene and dignity through low-water solutions.

How we did it

MJV conducted a qualitative study combining:

- **Exploratory Research & Netnography:** Analyzed online conversations about water scarcity in Brazil, uncovering cultural tensions and impacts on hygiene habits.
- **Cultural Probes & In-Depth Interviews:** Investigated women's beauty routines and adaptations across regions, socioeconomic backgrounds, and water scarcity scenarios.
- **Global Benchmarking & Inspiration:** Explored ancestral rituals and cosmetic innovations in India, Australia, and South Africa to identify relevant solutions and formulation strategies.

Deliverables

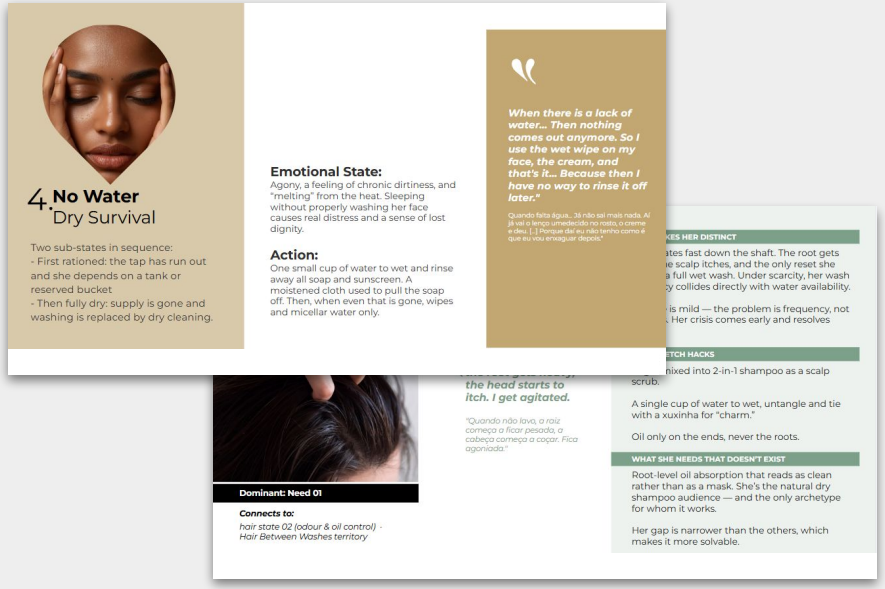

A Strategic Insights Report: a comprehensive mapping of Brazil's Water Contexts & Consumer Needs. The report also contained:

- **Category Impact Analysis**: A detailed breakdown of the Water Scarcity impact on self-care across Hair, Face & Body.
- **Products and Concepts Evaluation**: An assessment of how current cosmetic formats fail under scarcity and the adaptations consumers use.
- **Innovation Territories:** Strategic pillars where consumer tensions point directly to actionable product directions and new formulations.

Impact

The study widened the company's view of the competitive landscape beyond traditional beauty categories to include everything a consumer "hires" to maintain hygiene and self-worth under water constraints—from kitchen-cupboard hacks and baby wipes to complete product abandonment

By identifying how consumers' routines, trade-offs, and emotional needs shift across different water scarcity scenarios, the brand can strategically position itself as the essential companion in preserving daily dignity and uncompromised self-care in water-stressed markets.

Design sprints to build an innovation pipeline

CLIENT'S AREA

Marketing, R&D & Commercial

PROJECT TYPE

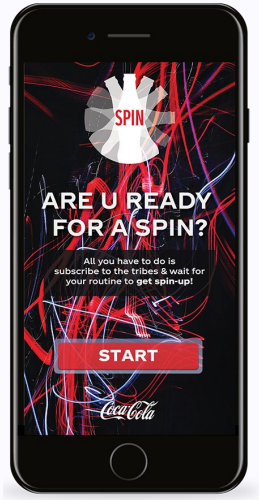

Consumer Insights & Trends, Product Innovation Strategy, Strategic Design

CAPABILITIES

Research, In-depth Interviews, Design Sprints, Product Design

We created and implement several Design Sprints to explore business challenges where the intent was to develop innovative and relevant solutions for a brand in a short time frame.

In a highly collaborative and multidisciplinary environment with **marketing, R&D, commercial teams, and also consumers,** we create an immersive 5 day experience guided by the Design Thinking process. As a result, we extracted valuable **insights from consumers, driven disruptive opportunities for the brands,** as well as shortened the conceptualisation process from **6 months to 7 weeks.**

Digital experiences Teen Charter: Istanbul & Toronto

To develop digital and live experiences to engage teens in daily lives and rituals to be piloted.

Brainstorming New Opportunities: Lagos

Bring together all stakeholders and collaboratively brainstorm new products and brand experiences and opportunities.

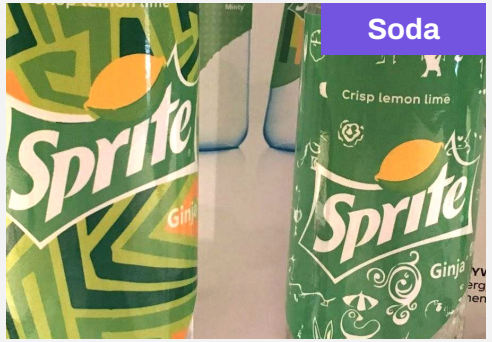

Brand Repositioning: Bucharest, Jakarta, Buenos Aires & Nairobi

Build full bundle alternatives with global reach and local relevance.
